

Vehicle Free Day

Objectives of the Practice:

- To reduce air and noise pollution on campus and promote a clean, green environment.
- To encourage students and staff to adopt eco-friendly modes of transport such as walking, cycling, and public transportation.
- To create awareness about the environmental impact of vehicular emissions.

TheContext:

With the growing number of vehicles, campuses are witnessing increased air pollution, noise, traffic congestion, and carbon emissions. To address this, the college initiated “**Vehicle Free Day**”, a regular practice aimed at minimizing vehicular movement on campus and promoting environmentally responsible behavior. This initiative reflects the institution’s commitment to sustainable campus development and aligns with national goals for a cleaner environment.

No vehicle day is observed every Tuesday and students are instructed to come to college by bicycles. Lecturers are instructed to pool cars to reach college or use battery run vehicles.

Circular for No Vehicle Day
